Re: Addendum to Outdoor Dining Proposal

ADDENDUM:

This Addendum is to the Outdoor Dining Proposal submitted to the city council on April 18, 2022. It was requested by the council during the workshop on April 20, 2022.

Specifically, the council asked the restaurants for more specific design elements to be used in the construction of the safety barriers in front of the restaurants.

- A. Each restaurant will use white jersey barriers (48" long, 32" high). These barriers will be uniform in style and shape (we will purchase them together).

These barriers are impact resistant and are removeable.

- B. These jersey barriers will have 24-32" gaps between them where the restaurant owners will install tasteful landscaping planters and plants.
- C. Each individual restaurant will personalize their barriers with additional landscaping and flowers. Colorful umbrellas in the outdoor dining areas will add to the aesthetic appeal of each restaurant's outdoor areas.
- D. There will be no tents or wooden structures on the barriers or in the outdoor dining areas. All current tents/wooden structures will be removed.

EXHIBIT I

Stackable Traffic Jersey Barrier Features

- Impact resistant
- UV and long-term fade resistant
- Uniform wall thickness with thicker corners and edges
- **Each item includes:** (1) Stackable safety barrier barricade, Drain plugs, screw-on fill caps and lids
- Durable and lightweight
- Compatible with square bolt-on or round screw-in lights
- Uniform wall thickness with thicker corners and edges

EXHIBIT II

Artist Rendering of Basic Design
